David Hartley
SMARTBANK

Re: Reference

Good day David,

I would like to take this opportunity to thank you from the bottom of my heart for developing this very smart Smartbank bank manager software.

It took very little effort, time and data to download the program and install it, but it has saved me tons of time and money. It is so simple to work with! It saved me 90% in time from processing from a paper bankstatement to only importing the bankstatement and allocating the entries on Smartbank.

And the cost – A saving of more than 50% from those other guys with their poor callcentre service!!!

Best of all was the after sales service! No email or query went unanswered or unassisted! You called me personally many times and made many suggestions. You were even willing to add a new bank's layout to your current software to accommodate one of my biggest clients' bankprocessing.

I will recommend Smartbank to everyone and anyone who doesn't want to sit and punch punch punch their days away!

I look forward to a long relationship with Smartbank.

Kind regards
Caren Blom
